Description: 1K125 is a 0.0125mm thick Polyimide film coated with <u>Silicone based</u> thermosetting

pressure sensitive adhesive. Outstanding, high temperature retention of physical and electrical properties. This product complies with the flame Retardant requirements of

UL 510.

Application: For use in high performance electrical applications, used on high-temperature coils, such

as in traction machine manufacturing, in the production of generators, capacitors transformers etc. May also be used for masking off gold contacts on PC boards during wave soldering process and during hot air level. It is used as insulation material of class

<u>R</u>
